WHY GRIZZLY.SKI

19 years of development

Our goal is to bring functional solutions of high quality with original design. Those crucial ones are patent protected.

Fast and easy handling

No need to waste time and attention on your equipment whilst in the mountains. The equipment is there for you, not you for it.

For those with highest demands.

Grizzly bindings are designed to cope with the most demanding mountain terrain, uphill and downhill where you appreciate low weight and technical perfection.

We support young talents and athletes

We are happy to support young talents and athletes

◆ HARD WEARING

Made of tough metals such as aircraft grade aluminium and stainless steel.

◆ FUNCTIONALITY

Quick to attach, with a fitting time of 1.5 seconds.

◆ LIGHTNESS

Each model are the worlds lightest binding for its category. Keep a light ski set up, even with a wider ski.

◆ SAFETY AND STIFFNESS

Great connectivity which meets all expectations even in demanding conditions.

MOUNTAINS AND SKI
MOUNTAINEERING ARE
OUR PASSION

Movement in the mountains has absorbed us so much that we tirelessly sought a way to develop a binding that would make it easier for people to access the mountains and experience the beauty of snowy nature

Nineteen years of work has resulted in many prototypes. In 2017 we started working more intensively to finish the ultra – light binding. The result was a development of a revolutionary platform for the easiest binding in the world.

By adding new features to new models of GRIZZLY.SKI bindings were created, each of which is the lightest in its category.

Since 2018, GRIZZLY.SKI has been a member of the International Ski Mountaineering Federation ISMF.

In 2019, the GRIZZLY.SKI brand became a finalist in ISPO Brandnew Award.

In 2020, the GR Olympic was awarded the ISPO Award Gold Winner.

How to enable the movement in the mountains and experience the beauty of snowy environment?

How to enjoy the race when everything works as it should?

These are the questions I ask every time I take a pencil and paper in my hand and I am going to create.

 Jozef Gáborík
author

In 2022, the Model GR Olympic won the Innovative act of a year 2021 award of Minister of the Economy of the Slovak Republic.

At the International Engineering Fair 2022 in Nitra, Slovakia we won the Fair Prize.

Since 2022, GRIZZLY.SKI has become part of INOVATO CLUSTER.

At the INOFEST 2022 innovation festival, Jozef Gáborík received the Innovator of the Year award.

The jury awarded the prestigious ISPO AWARD WINNER 2022 to two innovations from GRIZZLY.SKI. The GR OLYMPIC TOUR adjustable binding and the GR OLYMPIC RENT binding designed for ski rental shops.

We are still continuing to develop and test new products. Our goal is to bring new and functional solutions with original design.

GR 48

The lightest binding in the world.

The flagship from Grizzly.ski for athletes, but also for ski mountaineers looking for the lightest equipment. It is suitable for vertical races and downhill of any mountain terrain with it. Possibility to complement it with the crampons adapter.

GR 58

Ultra-light race binding.

Designed for competitors, but also for ski mountaineers looking for the lightest equipment. It is suitable for vertical races but you will appreciate its durability in downhill of difficult mountain terrain.

GR 78

Ultra-light race binding with a swivel heel.

Designed for competitors and fans of ultra-light. Original locking system with additional functions such as Grizzly Step for quick and convenient use. The GR 78 binding has a swivel heel which enables the ski boot to release in the event of a fall. This binding is suitable for training and racing.

GR 78 II

Improved ultra-light race binding with a swivel heel.

Designed for competitors and fans of ultra-light. Original locking system with additional functions such as Grizzly Step for quick and convenient use. The toe part contains an adapter slot for crampons. GR78 II has a swivel heel which enables the ski boot to release in the event of a fall. A heel part contains a microshift in the range of 10mm which makes it easier with different ski boots. This binding is suitable for training and racing.

GR 98**Ultra-light race binding including the removable brake.**

Designed for athletes and ski mountaineers who like originality and uniqueness. The weight of binding is 98 grams including the removable brake. The binding has a swivel heel which enables the ski boot to release in the event of a fall. It is suitable for training, racing and for everyday use by experienced skiers.

It meets the standards for use on ISMF races.

**GR 98 II****Ultra-light race binding including the removable brake.**

Designed for athletes and ski mountaineers who like originality and uniqueness. The weight of binding is 98 grams including the removable brake. The binding has a swivel heel which enables the ski boot to release in the event of a fall. A heel part contains a microshift in the range of 10mm which makes it easier to use with different ski boots. It is suitable for training, racing and for everyday user by experienced skiers.

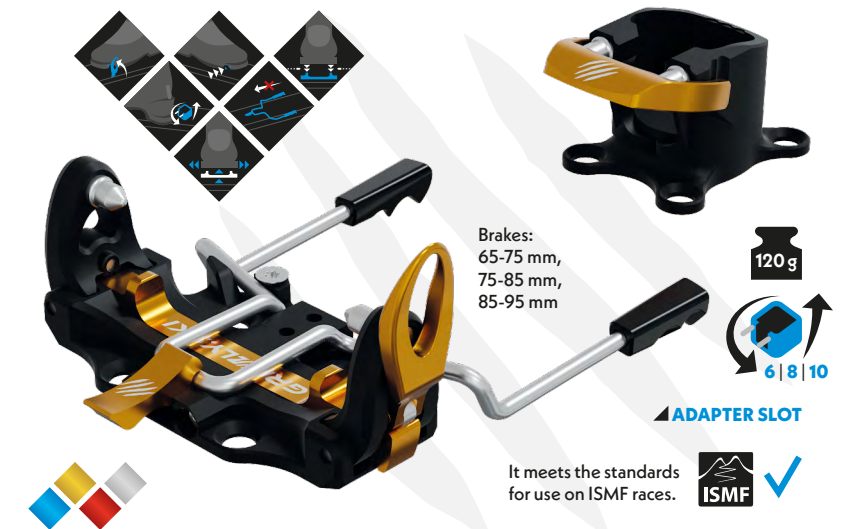

It meets the standards for use on ISMF races.

**GR OLYMPIC**

ISPO Award 2020 Gold Winner
Ultralight ski mountaineering binding awarded ISPO AWARD GOLD WINNER 2020.

Designed for racers and fans of ultra-light. An important design feature is the safety spring allowing the skier to release the ski boot from the binding in the event of an accident. The security ski-brake is an integral part of GR Olympic. The binding can be supplemented with an adapter for crampons. It is suitable for training, racing as well as everyday use.

It meets the standards for use on ISMF races.

**GR OLYMPIC II**

ISPO Award 2020 Gold Winner
Improved ultralight ski mountaineering binding awarded ISPO AWARD GOLD WINNER 2020.

Designed for racers and fans of ultra-light. An important design feature is the safety spring allowing the skier to release the ski boot from the binding in the event of an accident. The security ski-brake is an integral part of GR Olympic II. The binding can be supplemented with an adapter for crampons. A heel part contains a microshift in the range of 10mm which makes it easier to use with different ski boots. It is suitable for training, racing as well as for free and safe everyday movement in the mountains.

It meets the standards for use on ISMF races.

GR OLYMPIC TOUR

ISPO Award 2022 Winner
Ultralight ski touring binding
awarded ISPO AWARD
WINNER 2022.

Designed for lovers of movement in the mountains who do not want to carry excess weight. Based on the award-winning GR Olympic. Focused on safety and ease of use. The lightest ski touring binding with two heel heights and with adjustable release force settings from 6 to 10. A heel part contains a microshift in the range of 10mm which makes it easier to use with different ski boots. Integral parts of binding are also a crampon adapter and security ski brake.

GR OLYMPIC RENT

ISPO Award 2022 Winner
Ultralight ski touring binding
awarded ISPO AWARD
WINNER 2022.

Designed for ski rental stores that want the best for their customers. Based on the award-winning GR Olympic. Original safety bindings with adjustable release force settings from 6 to 10. Boot size adjustment of up to 70 mm. A quick and easy one key adjustment for all settings. Focused on safety and ease of use. Binding also includes a crampon adapter, security ski brake and two heel heights.

GR CRAMPONS ADAPTER

GR FUNCTIONALITY

GRIZZLY FIX

Original locking system. One locking arm allows the front mount to be released and locked.

GRIZZLY FLEX

– sets the space between toe pins to allow the use of ski boots from different manufacturers.

GRIZZLY STEP

– increases the positioning accuracy of the ski boot when engaging into the toe of the binding. GR48 – GR98 have adjustable Grizzly Step. GR Olympic family of bindings has static Grizzly Step.

GRIZZLY BRAKE

Ski brake with simple control and excellent braking properties.

SAFETY SPRING

Spring to increase safety. It helps to release the ski boot from the binding in downhill position.

ROTATING HEEL

A swivel heel part that allows the binding release in the event of a fall. Release force: 6 | 8 | 10

ADJUSTABLE BAR

Flipping the heel risers adjusts the boot angle making your climb easier on steep terrain.

ADJUSTABLE HEEL

Models GR Olympic Tour and GR Olympic Rent have adjustable safety release settings from 6 – 10

MICROSHIFT

Adjustable heel shift in 10mm range.

LIFETIME WARRANTY ON PINS

The pins of the GRIZZLY.SKI binding do not break and material wear is minimal compared to other materials on the market.
